

The inexplicable matter

Fons Wils

www.ontheorigin.com

December 2011

Strange properties:

- Wave- and particle behavior (of light)

The behavior of light changes
depending on the fact whether it is observed or not.

- Uncertainty relations(of all matter)

Properties like energy and time are not exactly observable at the same time,
The same goes for the position and the kinetic energy.

- Impossible to find gravitons (gravity)

The carriers of gravity are untraceable.

- Untraceable Higgs bosons (mass formation)

The particles that provide matter mass are impossible to find.

Even stranger:

the 99% missing mass of a nucleon is provided
by **Strong Interaction**:

neutron

939,57
MeV

2 MeV + 5 MeV

+ 5 MeV = 12 MeV

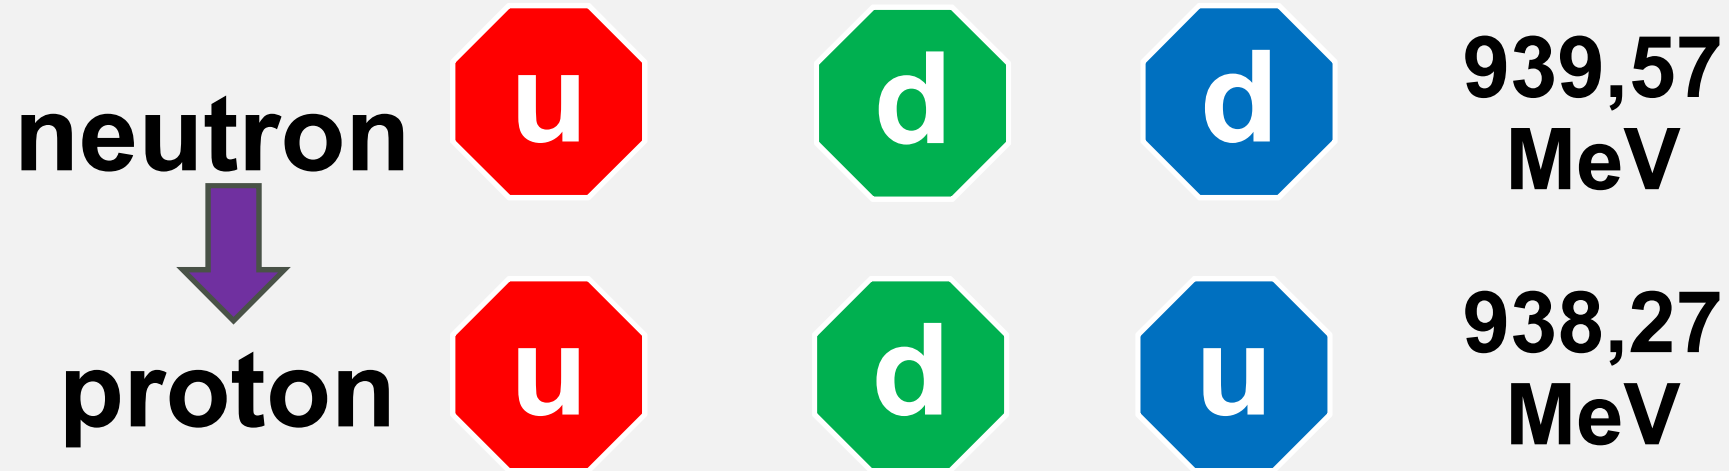

+ 2 MeV = 9 MeV

proton

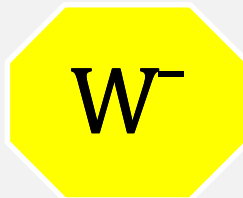

938,27
MeV

Most strange: Weak Interaction

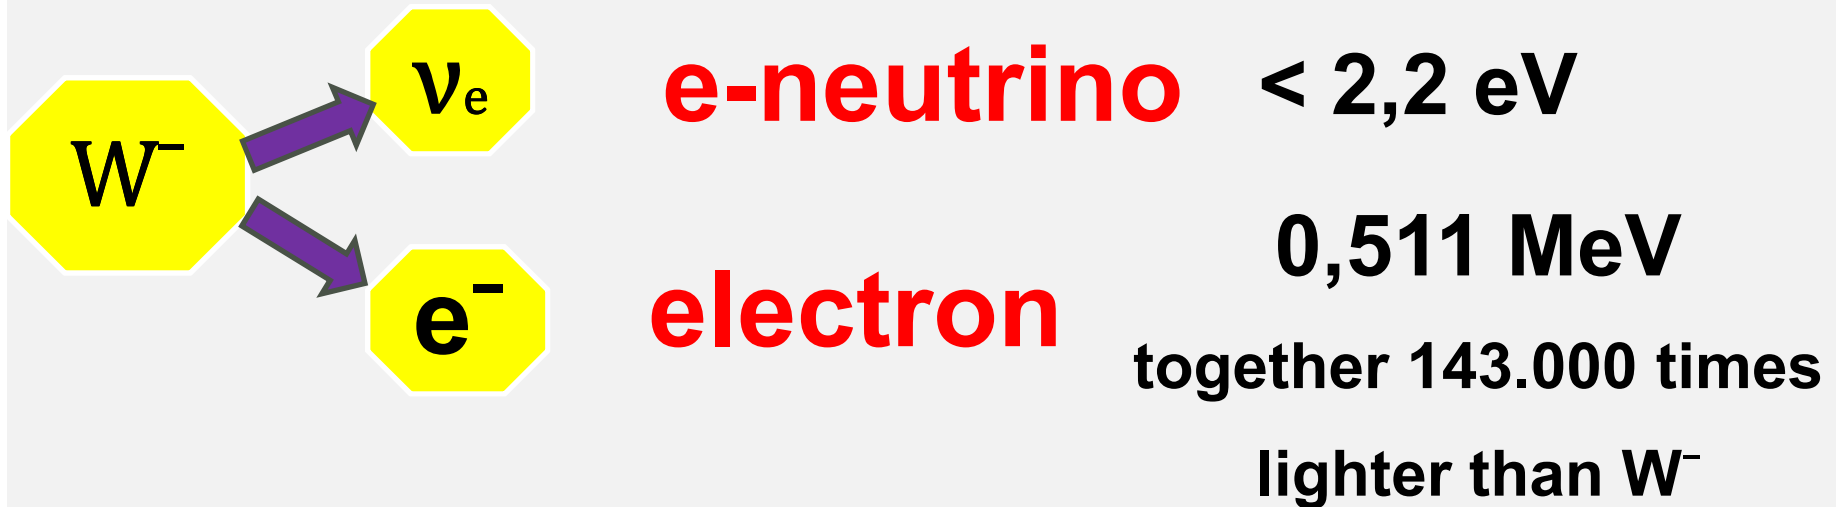

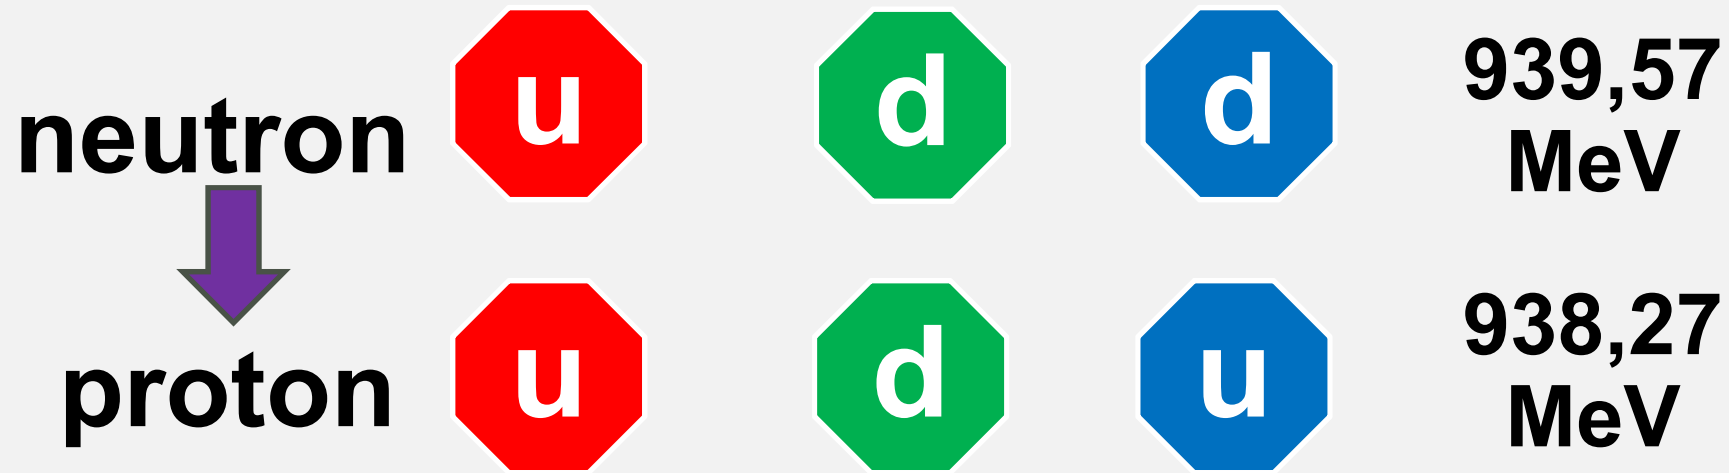

+

**intermediate
vector boson**

80,3 GeV
= 85 times
heavier than a
neutron

Transformation of W^- into lighter particles:

Preliminary conclusions of the physicists:

- To us space-time and the laws of quantum mechanics are like the decor, the setting of a play. The elementary particles are the actors and physics is what they do. A door that we see on the stage is not a door until we see an actor going through it. Else it might be fake, just painted on.
- You cannot explain the existence of certain particles much as you cannot explain the existence of this Universe.

2004

How can we tackle these problems?

Our consciousness
possesses of two different
mental spaces

They depend on our starting point:

From the small = **analytic awareness**

From the great = **holistic awareness**

Analytic = Detail-oriented

Making analytical deductions

- Material examinations
- Study Behavior
- Intellectualize
- Believing in Coincidence

⇒ ***SHORTSIGHTEDNESS***

Holistic = Global focus

Pursue mental coherence

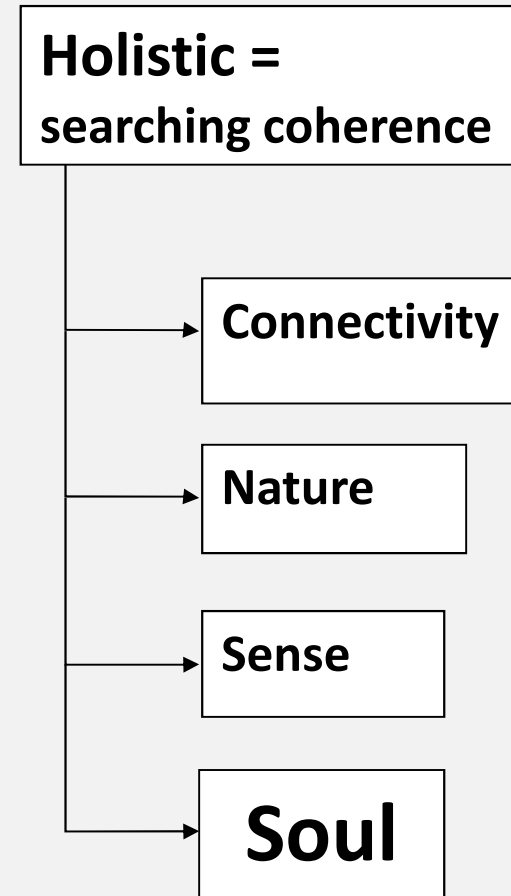

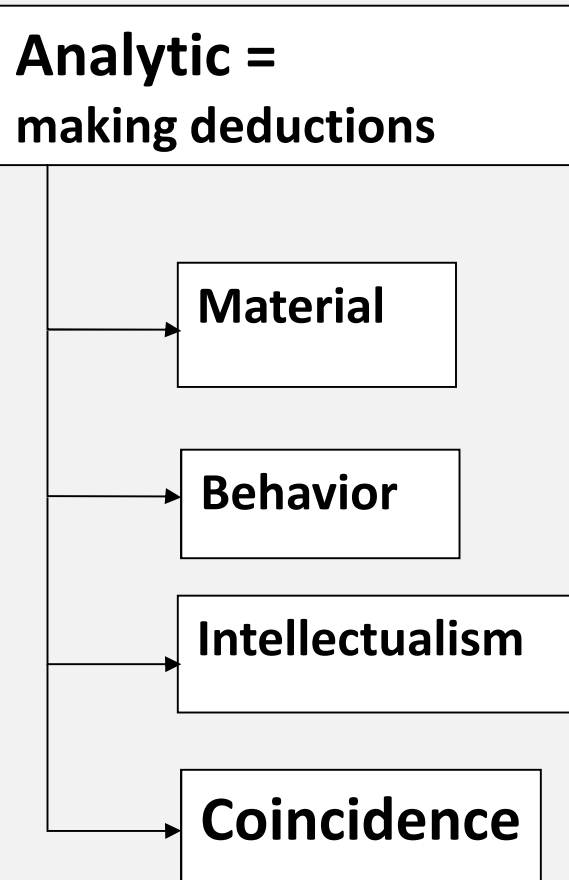

- Feel Connectivity
- Understand the Nature of things
- Sense authenticity
- Quest the Soul

⇒ ***DREAMY***

ordening Details

versus

Global oriented

I think so I am?

This statement by Descartes is an incomplete truth.

I think

I { see, hear,
smell, taste,
touch, sense

depict reality

imagine reality

I am = a piece of BEING

**The dualism between
analytic (A = ordering details)
and holistic (H = big picture)
should be lifted:**

A&H = H&A =

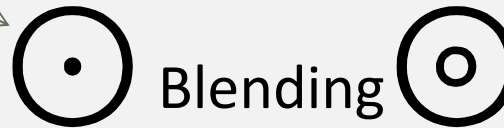

General overview & ordening Details

= Good

How to develop this blended awareness?

Analytic Mental Space

Holistic Mental Space

develop

New Mental Processes

∞ = dynamisation
& invigoration

**Linking both mental contents =
lifting dualism by going
from order to overview and back!**

Good \Rightarrow G∞D

The lemniscate stands for:
the entanglement of both extremes
but it also stands for:
entering the infinite
= gaining Insight!

When dualism has
disappeared completely then:

$$G\infty D = GoD$$

**Becoming immaterial is only complete
when the o transforms into a sizeless point:**

$$\begin{aligned} \text{GoD} &= \text{G.D} = \text{D.G} \\ &= \text{Divine Geometry} \end{aligned}$$

Can we build a theory of Everything
with the aid of G∞D ?
